

MLE Equipment Welcomes New Field Service Technician, Bryce Thomas

MACON, GA - (October 2010) MLE Equipment is pleased to announce that Bryce Thomas has joined our team as Field Service Technician for California and the West coast. Bryce is based in Sacramento, California. As a Field Service Technician, he is responsible for emergency repairs, commissioning systems, system modifications, and maintenance tasks. Bryce will also manage our storage yard in Sacramento, ensuring that our rental systems are in proper condition for deployment all over the West coast. In addition, he will manage our parts inventory on the West coast, allowing MLE Equipment to supply parts to customers in this region quickly and efficiently.

Bryce has five years of experience with remediation systems, with functions ranging from taking samples and running pilot tests, to system design and repairs and troubleshooting. He also has over 20 years of experience with the maintenance and troubleshooting of heavy equipment. Bryce is skilled in several trades essential to Field Service work, including PLC programming, plumbing, and electrical work.

“We are excited to have Bryce Thomas representing MLE Equipment as a Field Service Technician on the West coast” stated Jeremy Dayment, Vice President of Sales for MLE Equipment. “Bryce’s skills will allow MLE Equipment to continue to improve our service and rentals offerings in this very important area.”

“California and the West coast is a growing market for remediation and treatment equipment, and we are committed to supporting this market with the best possible sales and service” said Bruce Lounsbury, President of MLE Equipment.

About MLE Equipment (www.mleequipment.com):

MLE Equipment, a member of the Calco Environmental Group, designs, builds, commissions, and supports systems for soil-remediation and industrial applications. The systems range from single-well pumping systems to large, combined soil-vapor extraction/groundwater pump-and-treatment systems. Systems are highly-customized with sophisticated control systems, designed specifically to provide innovative solutions for our customers’ unique requirements. MLE Equipment also distributes a range of environmental products, including pumps, sampling equipment, air strippers, and carbon filters. MLE Equipment is the Canadian master distributor for QED, the leading manufacturer of groundwater sampling equipment in North America, and pioneers of MicroPurge sampling. Key customers include leading environmental engineering consulting firms, and large environmental contracting firms. Sales and support in Canada and the United States are provided through an established network of highly-respected business partners. MLE Equipment is known in the industry for its professional, long-term approach to the business, delivering quality solutions to support our business partners and customers’ success.
