

MLE Equipment Welcomes New Regional Sales Manager Denis Lemoing

BROCKVILLE, ON - (July 2010) MLE Equipment is pleased to announce that Denis Lemoing has joined our team based in Montreal as Regional Sales Manager for Quebec, the Maritimes, and the New England States. As the Regional Sales Manager Denis is responsible for developing and supporting sales and rental of MLE Equipment remediation systems, remediation products, and product support services. Denis is also responsible for QED and Catalytic Combustion Corporation sales in selected parts of the territory. Denis brings a wealth of experience to MLE Equipment, having over twenty five years experience in the industrial products and system business - working with cities, engineers, and contractors to develop equipment system specifications, and building sales and product support through key accounts.

"MLE Equipment is proud to have Denis Lemoing join our team in Montreal" stated Jeremy Dayment, Vice President of Sales for MLE Equipment. "Having sales and product support in Montreal for our environmental equipment systems close to our customers in Quebec, the Maritimes, and the New England States will allow us to serve our customers more efficiently."

MLE Equipment is focused on providing practical solutions for the treatment of contaminated soil and industrial applications" said Bruce Lounsbury, President of MLE Equipment. "We are pleased to be continuing our implementation of sales and product support across all of North America for our environment equipment system business."

About MLE Equipment (www.mleequipment.com):

MLE Equipment, a member of the Calco Environmental Group, designs, builds, commissions, and supports systems for soil remediation and industrial applications. The systems range from single well pumping systems to large combined soil vapor extraction/groundwater pump and treatment systems. Systems are highly customized with sophisticated control systems, designed specifically to provide innovative solutions for our customers' unique requirements. MLE Equipment also distributes a range of environmental products which includes pumps, sampling equipment, air strippers, and carbon filters. MLE Equipment is the Canadian master distributor for QED, the leading manufacturer of groundwater sampling equipment in North America and pioneers of MicroPurge sampling. Key customers include leading environmental engineering consulting firms, and large environmental contracting firms. Sales and support in Canada and the United States are provided through an established network of highly respected business partners. MLE Equipment is known in the industry for its professional, long term approach to the business, delivering quality solutions to support our business partners and customers success.
